A Note from the Commander

We have a lot going on this month, let's first look at some of the stuff we've accomplished lately. **Nancy** and I have finally finished the camera and have it installed on the roof of the **Oceanside Yacht Club** for all to see. Thank you, Nancy, for all your hard work on this project. The camera will be panning across the harbor mouth and then over to the Oceanside sign and we will probably have it do other things in the near future. But right now we're just trying to get a handle on how it works.

We had a great general membership meeting with **Dennis Alba** talking about scuba diving which was a very interesting presentation and all seemed to enjoy it. Thank you Dennis for your efforts.

May 1 begins the summer hours for Oceanside Yacht Club and the start of their Wednesday twilight series racing. **Timothy Zimmerman** is going to give a racing seminar on May 3 and a second one on May 10 at 7 to 8:30pm at the yacht and club all are invited. Then the racing begins on the 17th and every Wednesday night after that until August 9 which will be the final race. (*Check OYC webpage for details*). These races are open to members and non-members so all can join. I would like to get some volunteers and maybe we can all get together and go out and race on my boat. Or maybe somebody has a faster boat that they might be willing to sail with, and we should have an **Americas Boating Club** team racing in this series. **Anyone interested drop me a line.**

May 6 is the **Women for Women** race which is a completely women lead crew at the helm, if there's any women out there interested in sailing in this race, please let me know as I need a captain to compete.

Commander's Report continued from Page 2

We will also be holding our **National Safe Boating Week Event** on **Saturday, May 20 at Oceanside Yacht Club**. We will have the new Oceanside lifeguard teams on site showing us some of their training techniques and what they do down at the harbor. We will be giving out life vests and doing a whole bunch of training. If anyone knows of any other kind of boating organizations that may be interested in showing up give me a call and give me their info were looking to invite anyone and every-one.

I would also like to let everyone know that **Darryel Simmons** has become our new **cooperative charting** representative and we would like to get together and do some cooperative charting. Geodetic markers are part of the program. Please go to this website and watch the presentations on the Geodetic Mark recovery program. There is an 8 part series presentation on the [Joys of Geodetic](#) - watch it and you may decide that you'd like to try it. You must be logged into National before you click on the link. A couple of geodetic report apps that you can use for Apple is [Benchmark Hunter](#) and for Android it is called [BenchMap](#). This is a very good way to go out and have fun as a small group while helping to provide much needed support to NOAA and our local communities.

at 12 noon (help set a record)**

S.E.O. EDUCATION UPDATE

Last week I was asked by our **District Education Officer Cida Diehl, SN – CN** if we should try to teach some of the seminars that

one must take in order to meet the requirements for the IN and CN qualifications.

INLAND NAVIGATOR PASSPORT list the following:

You must have taken **Seamanship (Boat Handling)** and passed, **Engine Maintenance** and **Marine Electrical Systems**.

Marine Electrical Systems is being offered on **June 8, 2023**, cost for member \$70.00. The next time we will offer this class will be late 2024.

Seminars of 2 hours each are: *How to use a Chart, Using GPS, Using VHF&VHS/DSC, Marine Radio, On Board Forecasting. Under Skill Demonstration; Use of a Fire Extinguishing and Powerboat Handling.*

Commander **Shawn Goit, JN – ON** gives this training throughout the year.

I have included a picture of the Inland Navigator Passport.

For the **Costal Navigator Passport**, the following courses are required: *Piloting, Weather and Marine Communication Systems.*

Seminars: *Anchoring, Rules of the Road, Tides & Currents and Marine Compass.*

Skills: *Pyrotechnics and Navigation.*

The seminars that are required can be done in two hour sections. The cost for each seminar used to be \$40.00. The cost of Passport is \$40.00, and we have some on hand.

We are interested in your thoughts on this topic.

Our **Engine Maintenance Class** exams, with 4 students have been sent to USPS for grading.

As stated earlier, our next class **Marine Electrical Systems** will start on **June 8, 2023** at **OYC** at **7.00pm**.

If we have 5 or more we will start the **Marine Navigation (Piloting)** class.

Happy Boating.

SAFETY LESSONS LEARNED FROM THE ...

MAY 2023

April did not include any boating adventures or time on the water for us. Even though we spent a week in **California**, met with our old boating friend, attended a boating safety conference, and taught a seminar about our organization. Still, the one sailing event we had lined up was canceled. We are determined to plan better the next time we visit the west coast.

So while "*Spring has sprung*" as they say in this part of the country, and the gardens and house repairs are high on my list of things to do, let me now focus on my monthly message about boating safety.

At the **April** challenge, we looked at our "*Actions to avoid collision*". And maneuvering with power-driven vessels in a harbor. This may be an excellent opportunity to remind you that every USCG Rule applies INLAND in one way, but INTERNATIONAL in another. These two sides are often similar or identical, but sometimes significant differences exist. So it is always good to compare the two. **So I asked:** *when power-driven vessels are in a crossing situation, what would one short blast by either vessel mean?*

You can find the answer in Rule 34 (a), where the INTERNATIONAL meaning of one blast is "

am altering my course to starboard," and the INLAND meaning is "*I intend to leave you on my port side.*" **That means that answer A is correct.** *What is the difference?* For INLAND, in the harbor, you may not need to shift course. All you have to do is respond (same signal if in agreement or the danger signal). Outside the harbor, you should not alter course or speed, if you agree, or sound the danger signal. In agreement, there is no response signal expected. Thank you, **Commander Allan Bombard**, for immediately sending me the correct response.

For the **May challenge**, I would like us to stay a while longer with sound signals.

We will also remain with power vessels and INLAND. In reality, even sailing vessels are power-driven most of the time when leaving the dock, right? *So your power-driven vessel is leaving a dock or berth. You must sound _____.*

- A) *two short blasts*
- B) *one long blast*
- C) *one prolonged blast*
- D) *one short blast*

Note that this INLAND rule does not have an INTERNATIONAL equivalent. Even if you immediately know the answer, I hope you consider taking a course from our **Americas Boating Club Oceanside**. See Page 6 of this newsletter for the latest on classes and seminars.

To see if you can join, please get in touch with **Jan Follestad** at <https://americasboatingcluboceanside.org/classroom/>

Includes Book**

Marine Electrical Systems

Don't get short circuited; learn how boat electrical systems work, how to diagnose problems, and how to do simple repairs and upgrades.

ENROLL NOW

In-Class Instruction Starts June 8, 2023

What's included?

- Boat electrical wiring practices
- Direct current (DC) power and Alternating current (AC) power
- Galvanic and stray current corrosion
- Lightning protection
- How to use a multi-meter
- How to solder and crimp
- How to read electrical wiring diagrams

While YouTube can be a valuable source of information, taking an in-person class has several advantages, including:

interactive learning
personalized attention
networking opportunities

The most important reason - Instructor Jorge Alonso is a Marine Electrical Wiz!!!

[Sign up online—Click here](https://americasboatingcluboceanside.org/classroom/)

Oceanside Harbor LIVE

America's Boating Club, Oceanside and **Oceanside Yacht Club** are proud to present a YouTube Live broadcast of the Oceanside Harbor. Nancy Kangas, Shawn Goit, Kirk Lippert, and Darryel Simmons are the Web Cam Team. Check the harbor conditions or just have fun watching the boats going by. We will be putting a flag/windsock up soon to depict how windy it is. In the near future, we will also be posting weather details, like wind and temperature. Below are screenshots of some of the activity in the harbor in the last week.

PLEASE SUBSCRIBE AND LIKE

<https://www.youtube.com/watch?v=yHLVmPAh0Dw>

April was quite a month

New webcam positioned atop Oceanside Yacht Club (see Page 9. Webcam stand was built by Cdr Shawn Goit—see Nancy Kangas (the idea and project manager) standing next to the stand under construction.

SAFETY REPORT

JAKE ALCANTARA, P

Filing a **float plan** is an essential aspect of planning and preparing for off-shore voyages. A float plan is a detailed document that is designed to provide vital information to the **Coast Guard** or any other rescue agencies in the event of an emergency.

The plan serves as a way to communicate detailed info about the vessel, itinerary, and crew in case of an accident, and can assist search and rescue teams perform a more efficient search operation.

The Importance of filing a float plan before any sailing or water activity cannot be overstated. A float plan provides important context to search and rescue teams and the coast guard on the type of vessel, the expected route of travel, and how long the trip should take. It also helps them establish communication methods, the location and type of emergency equipment and supplies they should bring in their rescue effort. All of this information significantly reduces the response time, which can be critical in emergency situations.

In conclusion, a float plan is a crucial safety measure that is often overlooked by people who engage in water activities, and sometimes forgotten by those who venture off-shore. Communicating detailed information in a float plan is the only way to ensure that search and rescue agencies have the information they need to save the lives of people involved in boating or other water-based accidents. Remember, safety should always come first. So, if you plan to get out on the water, please take some time to let others know where you're headed!

D/Lt Jake Alcantara, P

Al & Lynne Cruz attend the Divers & Drivers Potluck Dinner

Any squadron/club member is welcome to attend the monthly board meetings just let an executive member know that you would like to be present.

Meetings are held at various locations.
Snacks provided.

America's Boating Channel Launches on Smart TV

USPS Chief Commander Presses Button at IBWSS Ceremony Little Rock, AR, 16 April 2023

America's Boating Channel® the U.S. Coast Guard funded boating safety and boater education video service, produced by **United States Power Squadrons®** (USPS), publicly launched its new smart TV offerings this afternoon during the opening ceremony of the **International Boating & Water Safety Summit (IBWSS)**.

The red-carpet gala event celebrated a collaboration among numerous Coast Guard non-profit grantees who contributed several hundred boating safety and boater education videos to the new services and marked a first for the media industry which has never before had a full-time television destination for all-things-boating. The services also feature boat fails, boating news, boat races, boating TV program series, movies for boaters, boating cartoons, and other high-appeal boating themed television programs.

In announcing the launch, **America's Boating Channel's Grant Project Manager Marty Lafferty** thanked the people who made it possible... *"Our Coast Guard Grant Technical Manager **Tom Dardis**, without whose leadership and support we wouldn't be here; the person who came up with the idea to put America's Boating Channel on smart TV - **USPS Past Chief Commander Mary Paige Abbott**; the super-star who has led this enormous effort—America's Boating Channel Vice President **Kathy Strachan**; America's Boating Channel Field Producers - **Jim and Sue Kuemmel**, and **Bill and Rose Stano** who are here tonight producing this event; and America's Boating Channel Business Affairs leader **Sari Lafferty**."* *Representing our amazing video content providers are, for the Water Sports Foundation—**Jim Emmons**; for American Canoe Association - the ACA—**Pam Dillon**; for the National Safe Boating Council—**Peg Phillips**; for the Corps Foundation **Rachel Garren**; for NASBLA - the National Association of Boating Law Administrators **Ron Sarver**; and for the Sea Tow Foundation **Gail Kulp**." **USPS Chief Commander Craig Fraser** appeared center stage to press the button that officially marked the launch of the America's Boating Channel on-demand app on Roku and FireTV, and continuously playing live channel on [Sports.TV](https://www.sports.tv)."*

Lafferty went on to say, *"Tonight signals the start of the first phase of our commercial operation. Our focus now turns entirely to our viewing audience. Together we will make our constituents aware of these new smart TV services, invite them to subscribe for free, and encourage them to tune-in and spread the word far and wide. America's Boating Channel is now truly the next best thing to being on the water."*

America's Boating Channel America's Boating Channel® is produced for United States Power Squadrons® (USPS) by Lafferty Media Partners (LMP) under a grant from the **Sport Fish Restoration and Boating Trust Fund**, administered by the U.S. Coast Guard. The service features professionally produced, high-definition, safe boating and boater education videos. America's Boating Channel has been recognized with the **National Boating Industry Safety Award** as the **2021 Top Marine Media Outlet**, and with the **2022 International Boating and Water Safety Summit Communication Award** for the top **Video Public Service Announcement (PSA) Series**. America's Boating Channel™

Promoting National Safe Boating Week, May 20-26, 2023

Recreational boating and water activities are enjoyed by millions of Americans each year. Boating safety advocates recommend all boaters and passengers have a life jacket and always wear it while boating. Regardless of your age or experience level, the data shows that life jackets save lives.

But a life jacket can only save your life if it's used correctly. Always keep life jackets clean and neatly stowed when not in use. Proper care of life jackets ensures that they'll work when they're needed and extends their useful life. Plus, fresh clean life jackets are more attractive to wear and desirable for people to use while underway on your boat.

In-the-water buoyancy testing should be conducted at the beginning of every season. Foam deteriorates over time, so test to ensure that your life jacket keeps your mouth out of the water. A serviceable life jacket should keep you afloat for several hours, with all hardware and straps firmly attached and in working order.

Videos are available that offer an overview of the importance of wearing and caring for your life jacket. America's Boating Channel produced these videos to help viewers learn it only makes sense to treat your life jacket as though your life depends on it.

Watching videos like "[Life Jacket Care](https://youtu.be/iEofd6mUwN4)" (<https://youtu.be/iEofd6mUwN4>) is an excellent way to understand how to properly care for your life jacket. America's Boating Channel also produced a sequel entitled

"[Life Jacket Wear](https://youtu.be/FgFLNGIbFxo)" (<https://youtu.be/FgFLNGIbFxo>). It shows how recreational boaters can ensure serviceability and extend the useful life of life jackets. Viewers also learn about special considerations for inflatable and foam-filled jackets. Also featured are tips regarding life jacket replacement. You can follow the above links or visit <https://www.youtube.com/@AmericasBoatingChannel> to find these and other safe boating videos, which are an excellent tool to help recruit participants to our educational program and to membership. Invite your friends and neighbors to watch, like and subscribe to America's Boating Channel to introduce them to what our organization has to offer.

In addition to YouTube, these professionally produced high-definition safe boating and boater education videos are available via the America's Boating Channel on-demand app on Roku or FireTV. [America's Boating Channel™](https://www.youtube.com/@AmericasBoatingChannel) is produced by the United States Power Squadrons® (USPS) under a grant from the Sport Fish Restoration and Boating Trust Fund administered by the U.S. Coast Guard.
